DESCRIPTION

LA DOLCE VITA IN THE CARIBBEAN

This wonderful villa offers an unparalleled living experience in one of the most coveted residential resorts in the Caribbean. This is an extraordinary opportunity to own a luxurious 7-bedroom villa in the prestigious residential seafront, located in the heart of Cabarete, Dominican Republic. The villa offers ample space for large families or groups who desire privacy and comfort. With seven spacious bedrooms, including two master suites, and nine luxurious bathrooms, this home reflects style and functionality. Each bedroom has a private bathroom and walk-in closet, providing a private retreat for each resident and guest. The villa's design provides separate wings, allowing up to three families to have separate living areas. This carefully thought-out layout ensures that everyone can enjoy their own space while being part of a larger family. The villa was originally completed in 2010 and underwent a complete modernization in 2022, which includes new furnishings that enhance the home's luxurious atmosphere. The

heart of this Caribbean home is its large outdoor living area, with 250 square meters of covered terrace surrounding a saltwater pool. The pool offers a perfect place for relaxation and recreation. Thanks to its southern orientation, the pool area is private and quiet, offering a peaceful retreat from the outside world. Inside, the villa boasts a stunning kitchen and dining area with glass windows, equipped with air conditioning. The kitchen is designed for culinary excellence, with gas appliances and dual power (110 and 220 volts). Additional facilities include a laundry room, staff quarters with bedroom and bathroom, a double garage, and four outdoor parking spaces. The villa is fully air-conditioned and insulated, making it comfortable and energy efficient. The high-quality insulation ensures that the house stays cool, even without air conditioning, a significant advantage in the Caribbean. Built to the highest standards, this villa stands out as a masterpiece of architecture and engineering...
